

IQmanager/IQfinder Camera Utilities

General Description

Vicon engineering has released the latest utility programs for IQeye cameras. These utilities are available on the Vicon web site: <http://www.vicon-security.com/learn-and-support/software-downloads/#iqeye-camera-software>.

The updated firmware is relevant to camera models as listed below:

Utility Program	Version
IQfinder	V3.2
IQmanager	V1.1.2

IQfinder

The IQfinder utility program has been completely rewritten to improve the ability to discover cameras.

Network selection

IQfinder now includes the ability to select which network interface(s) to search for cameras.

IQmanager

Uptime sort

When sorting a camera list by uptime, the sort order now displays by actual time rather than sorting alphabetically.

Bulk password change

The ability to select multiple cameras and change their privileged passwords has been added.

Known Issues

No known issues
